LASH LIFT AFTERCARE

Keep lashes dry and free of any oils, lotions, mascaras, facial cleansers or makeup removers for 24 hours. Avoid heat, steam, saunas and cooking over steam for 24 hours, as well.

Lashes are still malleable shortly after the service. If you typically sleep on your side or stomach, try to sleep on your back for a few days to avoid smashing or misshaping lashes.

After the initial 24-hour period you may use mascara to compliment your lash lift but avoiding waterproof eye makeup is always recommended.
